

POST-OPERATIVE INSTRUCTIONS FOR DENTIST AND STAFF

- Call the patient the evening of the surgery to answer any questions.
- Schedule patient for a follow-up check on Monday. Reinforce hygiene. (10-15 minutes)
- Remove sutures in 10-14 days. Be sure load is on appropriate implants only.
- Check patient in 2 weeks, and/or as needed, to check retention, healing, hygiene, etc.
- Change attachments as needed to provide retention and stability.
- In most cases, implants not immediately loaded, can have abutments/attachments added in 8-10 weeks (depending on initial stability).
- **Call us with any questions, concerns or challenges.**
